French

Experience

04/2023 - 06/2023

Achieve.nl

Full stack developer

In my role as a Full Stack Developer, I have specialized in developing robust and scalable web applications using the Next.js framework. With a deep understanding of TypeScript, Prisma, PostgreSQL, NextAuth, React.js, and Tailwind CSS, I have successfully built full-stack Next.js applications that deliver exceptional user experiences.

2022 - Present

Fiverr

Software engineer

As a software engineer on Fiverr, I have successfully delivered various projects utilizing my expertise in Django, Next.js, React, Python, and Node.js. With a strong focus on web development, my responsibilities included:

- Developing robust and scalable web applications using Django, Next.js, React, Python, and Node.js technologies.
- Implementing security measures and following web security best practices to protect against common vulnerabilities.
- Building RESTful APIs and integrating them with frontend applications.
- Designing and implementing efficient and user-friendly interfaces using React and Next.js.
