About Me

Driven computer science student with extensive Full Stack development expertise and a strong emphasis on web security. Dedicated to achieving excellence and making valuable contributions within a dynamic team environment. .

Education

2021-present

Higher National School of
Computer Science (ESI-SBA)

Skills

- Full-Stack Web Development
- Scripting and Automation
- Linux System Administration
- Backend Engineering
- Web application pentesting
- DevOps and Collaborative Work Tools

Toolset

- ReactJS, NextJS, Prisma, NodeJS, TailwindCSS
- Typescript, tRPC, GraphQL
- Python, Selenium, Django, Flask
- Burp Suite, nmap, Metasploit
- Docker, Git/Github.
- PostgreSQL, Redis,

Projects and Related Experience

2022-present Software engineer | Fiverr

As a software engineer on Fiverr, I have successfully delivered various projects utilizing my expertise in Django, Next.js, React, Python, and Node.js. With a strong focus on web development.

apr -june 2023 Full stack developer | Achieve.nl

In my role as a Full Stack Developer, I have specialized in developing robust and scalable web applications using the Next.js framework. With a deep understanding of TypeScript, Prisma, PostgreSQL, NextAuth, React.js, and Tailwind CSS, I have successfully built full-stack Next.js applications that deliver exceptional user experiences.

janv-june 2023 Property management system (PMS)

I collaborated with my teammates to develop microservices for a hotel property management system (PMS). Our focus was on creating modular components for reservations, billing, and room management. Leveraging technologies such as Docker and RESTful APIs, we achieved flexibility, scalability, and fault isolation. This experience enhanced my skills in distributed systems and demonstrated my ability to work effectively in a team to deliver efficient software solutions.

Achievements

May 2023

First Place in Coding Challenge

Me and my teammates have scored first place in the fourth edition of "coding challenge" organized by "alphabit club".
